

24 June 2020

Dear Parents/Carers

Science

The Science Department have been hugely impressed with the hard work and commitment shown by our students completing their Science work this year. For the rest of the term you will notice a slight change to the lessons being sent to your son via Show My Homework. He will continue to receive two pieces of work a week, however, the work will involve:

1. A revision/consolidation activity of the work he has completed so far this year
2. A home practical activity.

As you will appreciate Science is a very practical subject and since March your son would not have had the opportunity to take part in Science practicals as part of his work. The practicals that will be set for your son to complete have been designed to ensure they are straight forward and require minimal equipment. We have also ensured that there are clear safety instructions that your son must follow. If you would prefer your son not to take part in the practical task, or have not got access to the equipment required, there will also be another task for him to complete based around the practical.

Finally, you will also notice that the work will now be set by Mrs Mehta via Show My Homework who may not be your son's usual Science teacher.

If you have any questions please do not hesitate to contact me.

I hope your son enjoys the more hands on work that we have planned.

Yours sincerely

Ruth Christmas
Curriculum Leader of Science
