

28 January 2021

Dear Parents/Carers

Science

I am writing to you with regards to the upcoming Science assessments which will begin during the week commencing Monday 8 February. In order to provide a portfolio of evidence to support your son we will be setting regular Science assessments during their Science lessons on Google Classroom. We will be hoping to be able to set a number of these between now and Easter which will allow your son plenty of opportunity to demonstrate his skills, knowledge, understanding and progress. To support your son with these, we will be spending some of their lessons preparing them for these assessments.

We have been very encouraged with the engagement our year 11 students have shown in their Science lessons since the start of January and so please do congratulate and encourage your son to complete these assessments to the best of his ability and to continue engaging with his Science lessons. These assessments will provide the department with some of the evidence required to make judgements on his final GCSE grading, dependent on the outcome of the Ofqual consultations on Summer 2021 examinations.

If you have any technical issues or questions please do contact me at school on 01732 500600.

Yours sincerely

R Christmas
Curriculum Leader of Science
